REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior art of record Hamada et al teach compositions comprising nucleotide mixtures and sodium glutamate. The instant composition comprises at least two additives in a mixture selected from the group consisting of (a) a nucleic acid, a nucleotide, a nucleoside (b) glutamine and (c) glutamic acid, each additive if present is in a specific percentage range. The additive is then mixed in the percentage range of 0.05 to 5% with a feed. This type of a serial dilution of the additives and the amounts reflected in the compositions and the methods of using the same to increase body weight gain efficiency comprising the administration of the instant composition is not taught or fairly suggested in the prior art in the percentage ranges instantly claimed.

Any comments considered necessary by the applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".

Any inquiry concerning this communication should be directed to James O. Wilson, Primary Examiner in Art Unit 1623 at 571-272-0661.
